Archisman Panigrahi

4th year Undergraduate · Physics Major

Indian Institute of Science, Bangalore, India

□ (+91) 7980591664 | ■ archismanp@iisc.ac.in

Education

B.S. (Research) in Physics

Indian Institute of Science

• Current C.G.P.A - 9.7/10

Bangalore, India

Aug. 2017 - Apr. 2021 (expected)

Higher Secondary Examination (XII^{th} standard)

HOOGHLY COLLEGIATE SCHOOL

• Obtained $\mathbf{1}^{st}$ rank in Board

West Bengal Counsil of Higher Secondary Education, India 2015 - 2017

West Bengal Board of Secondary

Education , India

2005 - 2015

Secondary Examination $(X^{th} \ {\it standard})$

 $\begin{array}{l} {\sf Hooghly\,Collegiate\,School} \\ {\bullet} \ \, {\sf Obtained} \ 2^{nd} \ {\sf rank\,in\,Board} \end{array}$

Skills

Mathematical skills Integral Calculus, Linear Algebra, Trigonometry, Differential Equations

Comfortable with performing long algebraic calculations

Programming skills Familiar with MATLAB/Octave, Mathematica, Data structures in C

Languages Fluent in English, Bengali, Hindi

Topics of Interest

- Theoretical Condensed Matter Physics
- Emergent phenomena in Condensed Matter due to topological effects
- · Brownian Motion
- · Statistical field theory and its applications
- · Phase transitions

Achievements

2017-20	C.G.P.A 9.7/10	IISc, Bangalore
2017	1st rank (99.2 %) in Board in Higher Secondary Examination	West Bengal, India
2017	10th Rank in National Entrance Screening Test (NEST)	India
2017	Qualified for JEE Mains (All India Rank - 381) - an all India Engineering entrance	
2017	Qualified for JEE Advanced examination (All India Rank- 543), Entrance examination of Indian Institutes of	
	Technology (IIT)	
2017	Qualified for Indian Statistical Institute, Kolkata and Chennai Mathematical Institute	
2015	Qualified for K.V.P.Y (All India Rank - 128)	
2015	2nd rank (97.57 %) in Board in Secondary Examination	West Bengal, India

Various topics related to Topological Insulators

MPIPKS, Dresden, Germany (remotely)

May 2020 - September 2020

WITH PROF. BITAN ROY

- $\bullet \ \ \text{Studied and numerically implemented SSH Model, Chern Insulators, Quantum Spin Hall Insulators}\\$
- Studied effect of dislocation in Hermitian and Non-Hermitian Chern Insulators
- Studied how dislocation modes can be protected by symmetry
- Noticed similarity between plot of a quantity I analytically calculated, and a phase diagram in a paper (in a different context), from which I found a new interpretation of that phase transformation

Nano Heat Engines IISc, Bangalore, India

WITH PROF. H. R. KRISHNAMURTHY

May 2019 - July 2019

- Studied how harmonic oscillators and two state systems can be used as efficient heat engines
- Read Articles claiming they surpassed Carnot efficiency with "squeezing", and figured out the sense in which Carnot efficiency is surpassed
- · Studied how one can produce such a squeezed state of a harmonic oscillator using "squeezed thermal bath"
- Studied about Brownian Motion and Langevin equation
- · Solved the Langevin equation for a special kind of random force, for which a classical harmonic oscillator behaves like a squeezed state
- Created a computer simulation to verify the nature of this solution

Various topics on the Special Theory of Relativity

IISc, Bangalore, India

WITH PROF. SUBROTO MUKERJEE

May 2018 - June 2018

- Studied basics of Special theory of relativity four vector notation, Lorentz transformations, relativistic momentum and energy
- Studied how electric and magnetic field behave under change of reference frames
- · Worked out a detailed example of how a signal travelling faster than light can violate causality (see Articles section below)
- Studied relativistic Doppler effect of an electromagnetic wave travelling in a medium

Articles

These are some articles I have written (not published anywhere, click on the title to download)

- A Study of Generation of Classical Squeezed States Using Stochastic Force, and their Applications in Building Highly Efficient Heat Engines (2019)
- · Review article A detailed example of how causality is violated when information travels faster than speed of light in vaccum (2018)
- Review article Doppler effect of electromagnetic waves in refractive medium (2018)
- A Geometric Method to obtain Harmonic Mean of Two numbers (2016)

Relevant Courses Taken

Textbooks are given in brackets to indicate the level of the course

SEMESTER I

- Introductory Physics I Mechanics, Oscillations and Waves (An Introduction to Mechanics Kleppner & Kolenkow)
- Analysis and Linear Algebra I (Calculus, Volume I Apostol; Linear Algebra and its Applications Strang)
- Algorithms and Programming (in C)

SEMESTER II

- Introductory Physics II Electricity, Magnetism and Optics (Introduction to Electrodynamics by David J. Griffiths)
- Analysis and Linear Algebra II (Calculus, Volume II Apostol; Linear Algebra and its Applications Strang)
- · Introduction to Electrical and Electronics Engineering

SEMESTER III

- Introductory Physics Ill Thermal and Modern Physics (Thermodynamics Enrico Fermi; Fundamentals of Physics Halliday, Resnick and Walker; PHYSICS For Scientists and Engineers Serway & Jewett)
- Probability and Statistics (An Introduction to Probability Theory and its Applications Vol. I Feller; Intoduction to Probability and Statistics for Scientists and Engineers)
- · Introduction to Materials Science (Thermodynamics in Materials Science DeHoff)

SEMESTER IV

- Intermediate Mechanics, Oscillations and Waves (The Feynman Lectures, Vol I,II;)
- Intermediate Electromagnetism and the Quantum Physics of Radiation (The Feynman Lectures, Vol I,II; Introduction to Electrodynamics by David J. Griffiths)
- Intermediate Thermal Physics and the Physics of Materials (Thermodynamics and Introduction to Thermostatistics Callen; Fundamentals of Statistical and Thermal Physics F. Reif)
- · Numerical methods for solving differential equations

SEMESTER V

- Classical Mechanics (Classical Mechanics Goldstein; Mechanics Landau and Lifshitz)
- Quantum Mechanics I (Quantum Mechanics Cohen-Tannoudji, Diu and Laloe; Principles of Quantum Mechanics Shankar)
- Mathematical Methods of Physics (Mathematics for Physicists Dennery and Krzywicki; Mathematical Methods for Physicists Arfken, Weber and Harris)
- Fundamentals of Astrophysics (Astrophysics for Physicists Rai Choudhuri; Astrophysics in a Nutshell Maoz)
- Solid State Physics (The Oxford Solid State Basics Simon, Solid State Physics Ashcroft & Mermin)

SEMESTER VI

- Statistical Mechanics (Statistical Physics of Particles Kardar)
- Quantum Mechanics II (Quantum Mechanics Schwabl, Principles of Quantum Mechanics Shankar)
- Quantum Measurements (Quantum Measurement Braginsky, Khalili, Thorne)
- Electromagnetic Theory (Classical Electrodynamics Jackson)
- Physics at Nanoscales (Quantum Transport Atom to transistor Datta, Electronic transport in mesoscopic systems Datta)
- Quantum Computation (Audited)

SEMESTER VII (GOING ON)

- Advanced Condensed Matter Physics (Solid State Physics Ashcroft & Mermin, Principles of Condensed Matter Physics Chaikin & Lubensky)
- Advanced Statistical Mechanics (Statistical Physics of Fields Kardar, Principles of Condensed Matter Physics Chaikin & Lubensky)
- Quantum Field Theory I (Quantum Field Theory Srednicki, Quantum Field Theory and the Standard Model Schwartz, Quantum Field Theory for the Gifted Amateur Lancaster and Blundell)
